Design purity. Perfect performance.

The perfect way to feature glass surfaces in furniture: with its narrow bonding surfaces, the Sensys hinge emphasises the purist look of glass elements. And the integrated Silent System makes sure that delicate glass doors close gently and reliably.

Powerful material mix

The strong bonding system also lets you combine fronts and cabinet bodies in different materials. This way, Sensys gives you new design perspectives. Unobtrusive and minimalist in form, extremely convenient and secure in function.

The most stylish way to move glass: **Sensys for glass applications**

Sensitive material – superior technology

Perfect soft closing is an absolute must when using glass doors. With its wide, 35° automatic closing angle and excellent soft closing performance, Sensys closes even heavy doors gently and reliably.

Combine Sensys for glass applications with other hinges from the Sensys family – for consistent, perfectly balanced furniture design.

Frost proof and heat resistant

Whether in cool rooms or at high ambient temperature: the integrated Silent System never fails. Sensys closes glass and other doors gently and reliably. Always.

Other Sensys benefits at a glance:

- Combines stylish design with luxurious convenience
- Closes automatically from an opening angle of 35°
- Performs better than any of the others – saving a hinge in many cases!
- Inconspicuous glue mounting
- Perfect match with other Sensys hinges
