

Uniset

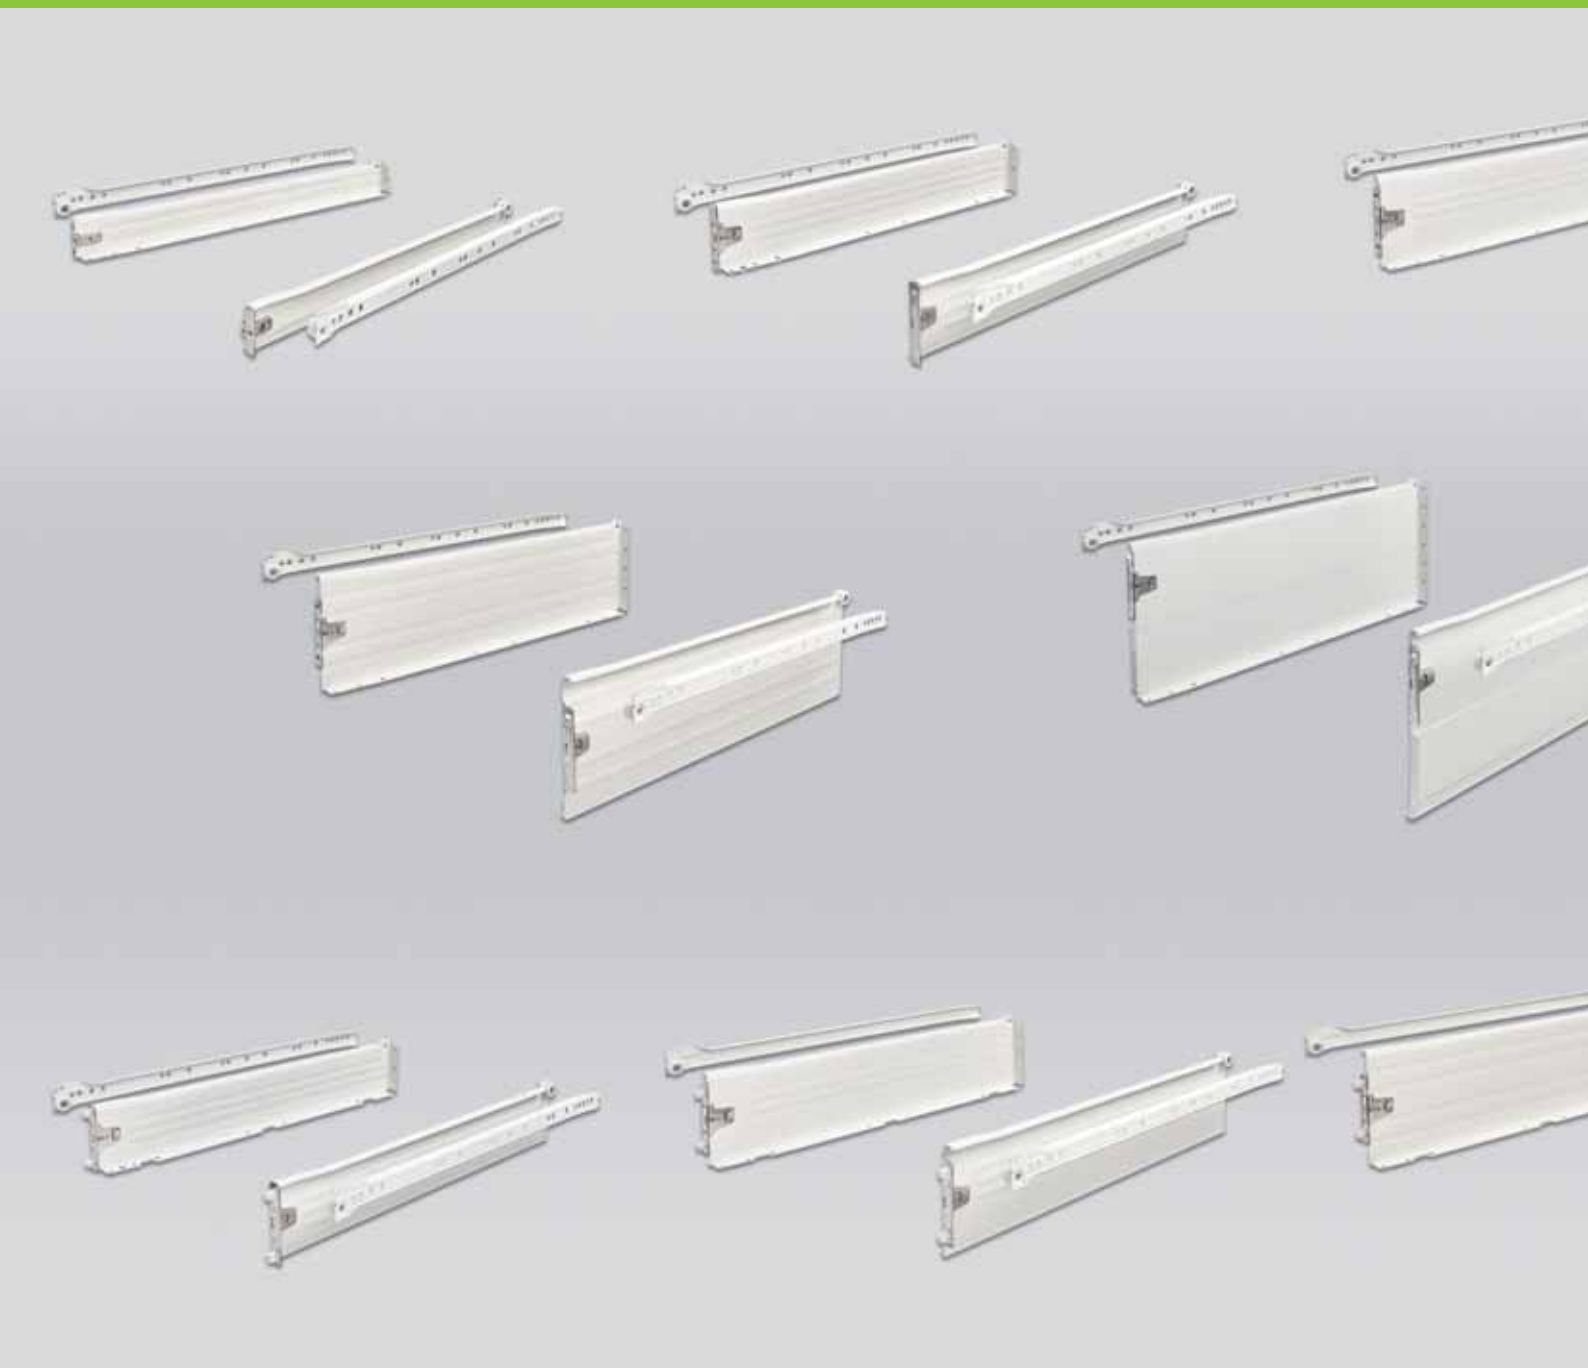

Affordable drawer system

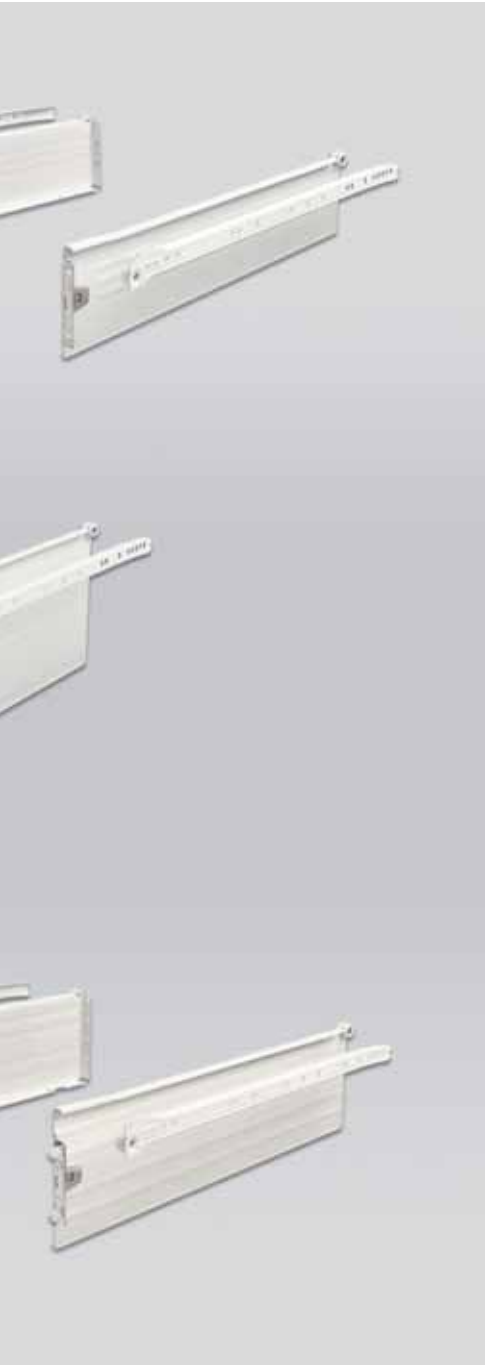

Simple, practical and economical

Largest range on the market

SlowMotion Zeta optional

Uniset drawers are used by a very large base of Kitchen and bathroom manufacturers all over the world for many years. It is the preferred solution of carpenters and cabinet makers in many countries. The reasons therefore are simple: it is the best affordable single wall quality drawer system on the market. The product is of solid make with up-to-date features, including an optional SlowMotion Zeta damping system. Uniset drawers are used from entry level kitchens to medium level applications and thanks to excellent build quality in a dedicated plant, are up to the highest quality standards.

Uniset drawer 551 H53

Uniset 551 in height 53mm

Benefits for the industry

- Large range of dimensions from 250 to 550 mm depth
- Identical width for wooden bottom and back panel
- Unilateral restraint-guiding to compensate for furniture tolerances
- Simple bottom mounting for ease of assembly
- Vertical front adjustment +/-1.5mm up and down
- Lasting quality thanks to optimised materials
- Choice of colours to match furniture finish
- Excellent load ability with 25kg standard capacity throughout the range
- 551 screw fixing and 561 dowel fixing drawer versions
- NoTool application for SlowMotion Zeta Anyway

Benefits for the consumer

- Smooth functioning thanks to new generation of wheel design and epoxy finish
- Long self-closing feature for secure and controlled closing
- Small extraction loss due to compact build
- Straight inner wall for space optimisation
- Ease of drawer extraction for cleaning
- Excellent load ability with 25kg standard capacity
- Add-on SlowMotion Zeta Anyway damping with stop-close SlowMotion^{FR} technology

INTERFER
www.interfer.pt

Round railing & separation tubes

Benefits for the industry

- Large range of dimensions from 250 to 550 mm depth
- Brackets for wooden backs and metal backs available
- Easy one-step fixing and screw-on for front attachment available as alternatives
- Economical round railing section for kitchen and bathroom applications
- Rectangular section for heavy duty applications

Benefits for the consumer

- Improved containment of storage in high drawer applications (pan drawers)
- Space management from back to front, thanks to separator tubes
- Lasting quality thanks to solid built and optimised materials

Internal drawer

4-sided internal drawer

Benefits for the industry

- Standardisation of cabinets with doors only and no need for multiple handles
- Retrofitable drawer solutions as internal application behind standard doors
- Front bracket for simple production

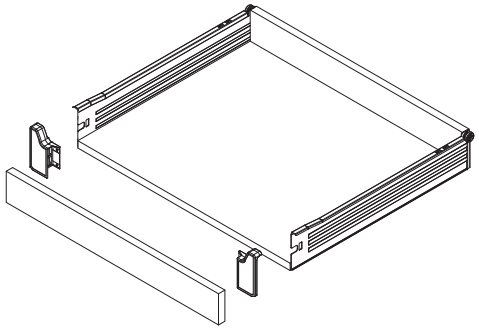

Benefits for the consumer

- Free positioning of the drawer, as there is no pattern imposed by drawer fronts
- Cost effective retrofit solution
- Ease of cleaning of large doors, instead of multiple drawer fronts
- Regular design of fronts in kitchen, especially of small size

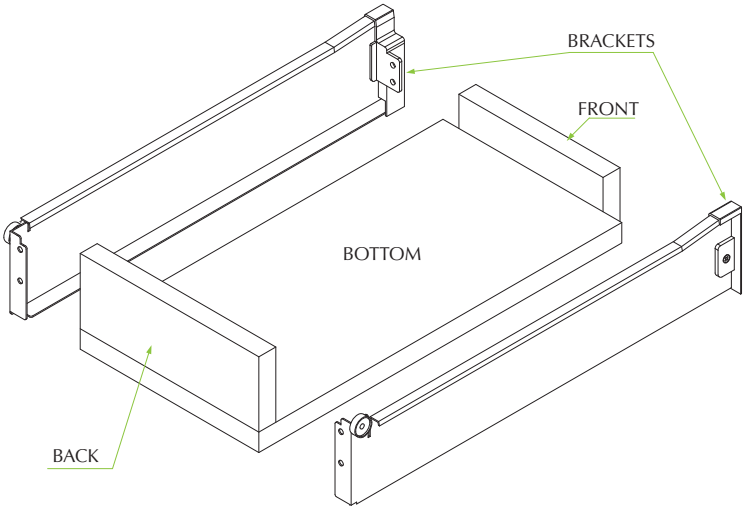

Code	Description	Packing
58.0200.01.00R00	Right front bracket for internal drawer H85	250 per box
